"ALPHA COOL" DUAL LIP AIR RING

Single
OR
Dual Lip

Quality built utilizing
only North American
OEMs components!

Alpha Marathon "New Cool" High Performance air ring with patented Laminar Flow Chamber incorporates a flow through plenum based on turbine technology resulting in minimal turbulence and better bubble stability. The New Cool air ring features three major components: air flow equalizing inlets, laminar vanes and the air ring lip adjustments; These three components create an air ring designed with significantly lower back pressure, higher output with increased bubble stability than other existing dual lip designs.

STANDARD FEATURES:

- ❖ Adjustable Outer Supplementary Lip for increased cooling efficiency and bubble stability
- ❖ Adjustable Upper Lip air flow
- ❖ Fixed or adjustable Middle Lip
- ❖ Precision machined cast aluminium construction
- ❖ Models are available to accommodate interchangeable lipset
- ❖ Patented Low Pressure design air chamber dynamically designed to reduce heat generation
- ❖ Magnehelic gauge
- ❖ Temperature gauge
- ❖ Stationary or rotating design optional
- ❖ Custom designed lipsets available
