HYDRAULIC SCREEN CHANGER

With the present demands imposed by the maturing industry to minimize the disruption process of the screen changer rapid screen replacements. Alpha Marathon's Hydraulic Screen Changers are designed to minimize these disruptions by introducing a clean filter media into the melt flow at a rate determined by the preset pressure drop across the filter media. Our Screen changers are made of high quality steel, thermally treated and rectified in their sliding parts.

FEATURES

- ❖ Slide manufactured from high grade tool steel.
- ❖ Complete with two detachable breaker plates, pre-hardened and ground.
- ❖ Includes neck & flange to extruder.
- ❖ Pressure actuated sealing mechanism.
- ❖ Complete with pre-wired heater bands and thermocouple.
- ❖ Cart

Complete hydraulic power unit with accumulator, 3 way valve, quick disconnect hoses and safety switch.

- ❖ Solenoid Valve with controls
- ❖ Hydraulically activated slide-type polymer filter.
- ❖ Hydraulic hoses
